| 150mm Lamp Harp 2 Leg | Code: LA8546 |
| 210mm Lamp Harp 2 Leg | Code: LA8547 |

Lamp Bases

All our lamp bases are solid cast metal and are finished in antique brass, each base is supplied with a brass lamp harp where required. All lamp bases are wired to Australian Electrical Safety Standards.

Finding the right lamp base:

To find the correct height for your lamp shade measure the diameter of the shade, this equals the base height without the harp or cluster.

Remember lamp bases with harps are measured to the base of the socket, the measurement **does not** include the height of the harp.

Lamp bases with clusters are measured to the top of the cluster, to the height of the cluster must be subtracted from the base height.

Please note **stock varies** in store and lamp bases may need to be ordered.
