

Copper Foiling

Perth Art Glass

We carry a range of Venture Tape Copper Foil and accessories ideal for starting your next Copper Foil project. Different widths are available and can be used dependant on the thickness of the glass, the size of glass pieces or just the width of the desired solder line.

Masterfoil Plus Copper Foil

Plain copper foil is the cheapest way to buy copper foil. Ideal for use on opal glass where you cannot see the underside of the foil through the glass. Each role of foil is 33m long.

5mm Copper Foil **Code: CF1725-5MM**
 5.5mm Copper Foil **Code: CF1725-5.5MM**
 6mm Copper Foil **Code: CF1725-6MM**
 10mm Copper Foil **Code: CF1725-10MM**

Silver Back Copper Foil

Silver back copper foil is perfect for use with transparent glass when you can see the underside of the foil through your glass pieces or when you intend to leave the solder silver. Each role of foil is 33m long.

5.5mm Silver Back **Code: CF4414-5.5MM**
 6mm Silver Back **Code: CF4414-6MM**

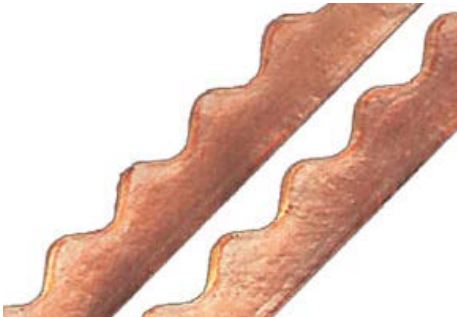

Black Back Copper Foil

Black backed copper foil is ideal for use on transparent glass when you can see the underside of the foil through your glass pieces or when you intend to black patina the solder. Each role of foil is 33m long.

5mm Black Backed **Code: CF4415-5MM**
 5.5mm Black Backed **Code: CF4415-5.5MM**
 6mm Black Backed **Code: CF4415-6MM**

New Wave Copper Foil

New wave copper foil adds a decorative effect to your solder. The wavy edge of the foil and its extra width allow you to bead the solder onto the foil. Whilst the wider areas become raised and the narrow areas remain normal, allowing you to create a wonderful effect with very little effort.

New wave copper foil is excellent when used on a border or as an edge on a centerpiece in items like jewel boxes and suncatchers.

New Wave Copper Foil **Code: CF4416**

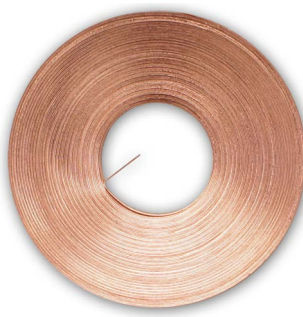

Silvered Copper Foil

Silvered copper foil can be used on transparent glass where you can see the underside of the foil through the glass pieces. It is perfect for when you intend to just tack solder you pieces together and a lot of solder can be saved using this technique. Each role of foil is 33m long.

6mm Silvered Foil **Code: CF1660**

Copper Re-Strip

Copper restrip is a semi-rigid strip for use as an invisible structural reinforcement.

It adds rigidity to long unsupported spans and fragile constructions subject to shock, vibration, gravity or wind.

4.5mm Copper Strip Roll 7.5m **Code: CF4205**

Glastar Glasfoiler™

A remarkable time-saver engineered to speed up and simplify copper foiling. Faster than hand foiling, you can apply foil to glass edges in half the time-or less.

The Glasfoiler™ accepts 3 sizes of foil: 3/16", 7/32" and 1/4"; and can dispense 2 different sizes at the same time.

Glasfoiler **Code: T40200**

Copper Foil Sheet

Copper foil sheet is made of superior, high tensile, malleable copper alloy. It is adhesive backed and is suited for filigree overlays or for burnishing special decorative details.

A packet contains one 305MM X 305MM sheet.

Copper Foil Sheet **Code: CF1626**

Edge Master Copper Foiler

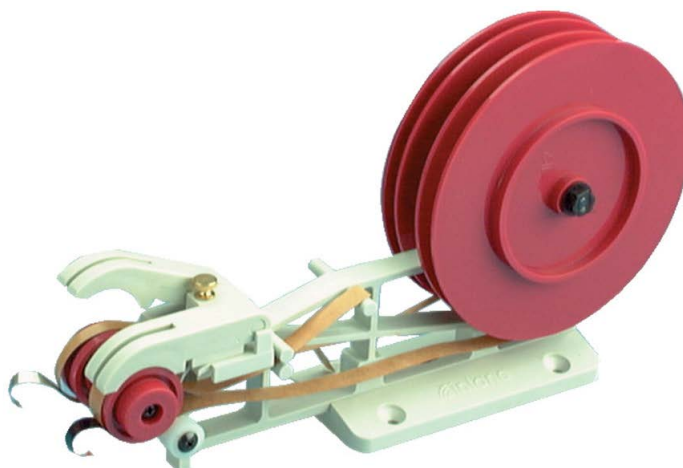

Automatically crimps foil while it is applied for more even solder lines. The tension wheel prevents foil from unravelling when the foil isn't being drawn. The unique design allows the foiling wheel to overhang your work table so it's not in the way.

The application wheel has a small diameter to make foiling very small pieces of glass easy. The Edge Master handles three sizes of foil:

- 5mm
- 5.5mm
- 6mm

Edge Master Copper Foiler

Code: T70000

Hand Foiler

Easy to use, inexpensive and accurate beyond belief. The Hand Foiler makes copper foiling effortless.

Hand Foiler 6mm
Hand Foiler 5.5mm
Hand Foiler 5mm

Code: T2391
Code: T2392
Code: T2393

Kwik Krimp

To smooth down foil onto glass surface and overlaps. Burnishes foil to 3 sides in one swipe.

Kwik Krimp

Code: T2403

Tidy Foil Dispenser

End fumbling with a roll of copper foil while wrapping glass. The plastic tray holds all sizes plus some tools.

Tidy Foil Dispenser

Code: T2406
