Metal Moulds

Metal Moulds for slumping glass, made from stainless steel they are the perfect light weight mould to slump over and can be used for countless firings.

Please note **stock varies** in store and moulds may need to be ordered.

Bracelet Former

A fantastic mould for making bracelets, the mould has a steady base for easy removal of formed bracelet. Simply heat a decorated strip of glass up and when it is molten, open up the kiln and bend the glass round the mould using graphite paddles or tongs to begin to close the circle.

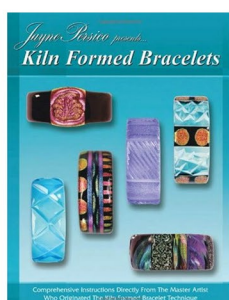

Bracelet Former Large Code:
FBRACELET-LARGE

Graphite Bracelets Tongs

Graphite Bracelet Tongs are used to manipulate the glass around a Bracelet former whilst the glass is molten. We recommend that you wear heat resistant gloves when working with an open kiln whilst it is at a high temperature.

Graphite Bracelet Tongs Code:
FBRACELET-TONGS

Kiln Formed Bracelets

An introduction to glass formed jewellery it is a step by step guide to creating your own kiln formed 3 dimensional glass masterpieces.

kiln Formed Bracelets Book Code:
BKFBRACEL

Floral Formers

The floral formers are a stainless steel mould for draping fused glass pieces. Simply kiln wash the mould and place glass over it. This former will last a very long time if not forever.

Floral Former Large Code: **FFLORAL-LARGE**

Floral Former Small Code: **FFLORAL-SMALL**
